

Grade 5 going into 6 Summer 2020 Math Assignment

- A. The first part of your summer Math work is assigned through Mathletics. The work assigned is based on what Mrs. Stella covered in the 5th grade.
- B. The second part of your summer work is to create a project based on your mastery of one of the skills taught in 5th grade. You must “teach” the skill to the class and you can do that in the form of a slide presentation, a video, Powtoons, or a game. If you choose a slide presentation or video, you must include questions for the class to work on as well as a poster explaining or advertising your topic. Be creative.

If we are released from social distancing over the summer, you can work within a group of no more than 3 people.

If have any questions, don't hesitate to email me over the summer: memeh@stephremacademy.org
